(2) The columns observed in the Dessau-Zerbst area between 22 and 27 October 1951 included about 50 tanks and armored reconnaissance cars, 50 AT guns and 180 trucks of the 21st Gds Meez Div; trucks with 30 AT guns of the 7th Gds Tank Div; and 3 columns with 30 pontoons each of motor transport units of both the 21st Gds Meez Div and the GDFG. The pontoons are believed to belong to a GDFG pool for bridge-building equipment which, according to previous reports, may be located in the Pioneer Kaserne, Cossau. The rail and road movements, reported in paragraphs 1 and 2, indicate that a river-crossing exercise at the level of one reinforced division was held in the Dessau-Zerbst area at the end of October 1951.

(3) Vehicles of the unidentified engineer battalion of the 57th Gds Itz Rifle Div. according to previous information by the same source, the battalion is believed to have returned to the barracks installation on Flemminger Weg, Naumburg, from Bad Koesen during the first half of October 1951.
